

## How to Install the Squeeze Page Package

1. Uncompress the zip with your favorite file extractor.
  - Winzip
  - 7zip
  - Windows File Extractor
2. Using your favorite FTP program, upload the contents of the squeeze-package folder, not the folder itself.
  - Filezilla
  - CuteFTP
  - FlashFXP
  - You can learn how to use filezilla [here](#).
3. Open your favorite web browser and point the url to <http://youdomain.com/setup> if you installed package on the root of your web hosting or <http://youdomain.com/folder-you-installed-squeeze-package/setup> if you installed the package in a sub folder.
4. Simply click the login button, no login and password are needed for the first install.
5. You can watch tutorial videos on the different sections of the Squeeze Page system here.
